## EXPERIENCE

### Full Stack Engineer, Ricoma International Corporation, Miami, FL

April 2019 - Present

Handled several projects from initial planning, to development, to deployment, bringing the company's visions to life. In addition, I integrated several applications in order to increase the productivity of other departments by automating daily tasks.

Technology used: [Laravel](#), [vue](#), [shopify](#), [aws](#)

### Backend Engineer, govWorks, Miami

September 2018 - April 2019

Implemented key features on the company's backend infrastructure. Also automated nearly all the setup tasks for the software stack on local machines, which sped up the onboarding of new developers.

Technology used: [Laravel](#), [node](#), [bash](#)

### Web Developer, Miami Innovators Association

August 2017 - May 2018

Developed a web application for an organization at my school which automated member onboarding, payment collection, and pairing with internships, as well as making communication from the organization to the members easier. The application greatly reduced the work of the board by taking care of lengthy tasks that used to be done by hand.

Technology used: [Laravel](#), [vue](#)

### Discovery Lab Intern, Florida International University

May 2014 - July 2014

I built quadcopters from scratch and the remotes to control them. Along with the team, I taught a one week long camp to high school students on building and flying quadcopters. I had the chance to work with PhD candidates and improve my skills in microcontroller programming.

Technology used: [Arduino](#), [c++](#), [processing](#), [java](#)
